Dragon Jacket Releases Two New Product Lines to the Industrial Insulation Market

Dragon Jacket recently introduced 2 new product lines: the Patented Insulated Pipe Saddle and Pocketed Coupling lines, which bring new innovation across multiple industrial applications, and, like Dragon Jacket's other products, is rated in Class A of the International Fire Code.

Dragon Jacket's Insulated Pipe Saddle line has a minimum compressive strength of 900 PSI, and insulates pipe from mounting brackets, and also creates connection points for existing or additional insulation. The Insulated Pipe saddle may be mounted vertically or horizontally, and installed with a U-bolt connection.

Dragon Jacket's Pocketed Coupling line is engineered to insulate and encapsulate all styles of twin bolt grooved couplings, and create attachment points to and from existing or additional insulation. Both products' standard size range is from 2 inches to 12 inches, but can be made in any size up to 36 inches to fit any specific application. For more information,

please visit www.dragonjacket.com.

Shurtape Technologies, LLC, Launches New Website

Shurtape Technologies, LLC, a producer of pressure-sensitive tapes, recently launched its new website: TapeUniversity.com, to make it easier for students, educators, tape distributors, and others to access helpful information about choosing and using pressure-sensitive tapes.

The site is currently focused on the HVAC and packaging industries, but additional industries will be added over the next few months. Visitors will find blog posts, videos, and articles by Shurtape's product management team, covering topics such as the differences between HVAC tape backings and adhesives, why some packaging tapes will not stick to recycled cartons, and how tape can cause downtime on the packaging line.

The site also serves as the online home of Shurtape's Mission: HVAC and Mission: Packaging programs. Through these programs, the company
