## Polyguard Introduces Polyphen Insulation

Patrick Dunn, Vice President of the Mechanical Products Division of Polyguard Products, recently announced the introduction of PolyPhen™ insulation into the mechanical insulation market.

PolyPhen has an excellent K value (.15k) and a 0,0 rating on ASTM E84; the base 2.5# closed cell foam density insulation will be orange in color. The product is available for shipping as of March 2016. The insulation will be available in 4 densities to fulfill all insulation and hanger location requirements. For more information, please visit [www.polyguard.com](http://www.polyguard.com).

## Dragon Jacket Secures Financial Support from Investment Group

Dragon Jacket, designer and manufacturer of industrial insulation products, has secured financial backing from a group of investors including Avista Development, a non-utility subsidiary of Avista Corporation; Pearson Packaging Systems; Irish Eagle Investment Group, LLC; and Wolff Investment Vehicle, LLC.

Dragon Jacket provides a patented, fully-encapsulated, closed-cell foam solution for the industrial

insulation market. Dragon Jacket insulation products are engineered for superior durability, and form an impermeable insulation barrier that is resistant to water, most chemicals, and corrosion. The ease of installation not only allows for efficient removal and re-installation as needed; but also offers reduced labor costs and a quicker return to service.

The financial support of the investment group will allow Dragon Jacket to expand its currently installed base of pipe insulation from 15,000 feet to hundreds of miles in the next 5 years. The investors will provide strategic counsel, business expertise, and insights into product manufacturing, automation, and distribution. For more information, please visit [www.dragonjacket.com](http://www.dragonjacket.com).

## CertainTeed Makes Ceiling Installation Faster with High Performance Sereno Fine Fissured Acoustic Ceiling Panels

CertainTeed recently released Sereno™ Fine Fissured, a line of acoustic ceilings for commercial spaces. CertainTeed's Sereno Fine Fissured High Noise Reduction Coefficient (NRC)/Ceiling Attenuation Class (CAC) provides excellent performance in
