

100% WATERPROOF
Engineered to Perform in Humidity

MITIGATES CUI
No Corrosion Under Insulation

THERMAL STABILITY
Energy, Process & Cost Efficiency

FAST & EASY INSTALLATION
Installs While Ship is in Service

SALT & UV RESISTANT
100% Encapsulated & Impenetrable

DURABLE & REUSABLE
20+ Year Lifespan

DRAGON JACKET: MARINE-GRADE INSULATION THAT KEEPS YOUR FLEET IN SERVICE

Tough, Reusable Protection That Outlasts Traditional Insulation in the Harshest Marine Conditions

Unlike traditional fiberglass and cladding that deteriorates in marine environments, Dragon Jacket's patented, fully encapsulated system delivers lasting protection for valves, fittings, pipes, and tanks. Our tough, reusable insulation withstands harsh conditions without breaking down - including salt spray, UV exposure, humidity, and temperature fluctuations. The system installs quickly with standard tools and personnel, can be removed and reinstalled for inspections, and won't absorb fluids or allow CUI to develop.

By eliminating the replacement costs, disposal fees, and operational downtime associated with conventional insulation, Dragon Jacket keeps your vessels running efficiently and safely for decades.

Static R-Value **12.53 Per 2 Inches**

Static K-Factor **0.174 BTU-IN/HR-FT²-F**

Operating Temperature Range **-60 ° F to +350 ° F**

WHY MARINE OPERATORS CHOOSE DRAGON JACKET

- ✓ Withstand the harshest ocean conditions - from punishing salt spray and humidity to extreme UV exposure and constant vibration - without deterioration or damage.
- ✓ Maintain consistent temperature control for critical systems while providing superior freeze protection in all weather conditions.
- ✓ Reduce maintenance costs and vessel downtime with our one-and-done solution that installs quickly using standard tools, removes easily for inspections, and reinstalls without replacement - keeping your fleet operational.
